

HPC and SaaS Made Easy!

The screenshot shows the SYSFERA DS web interface. On the left, the "Projects" section lists a "Genomica" project with a description, download links for input files, and a preview of Mathematica code. In the center, the "My works" section displays a table of completed tasks (Genomica work 2013-05-22 17:26, Genomica work 2013-05-22 17:21, Genomica work 2013) and three bar charts showing task distribution by day, machine consumption, and task status. On the right, a Paraview-based simulation visualization shows a complex 3D mesh with colored regions, with a pie chart overlay showing the distribution of tasks across machine types (standard, large).

Bring HPC & Cloud environment to local desktop

Streamline simulation management

From non-interactive tasks to graphical post-processing

Increase productivity

Lower costs and time spent on IT support

We're on the booth #15
Come by for a demo!
