The heart of HPC

*A technopole dedicated to
HPC, Simulation and Big Data*

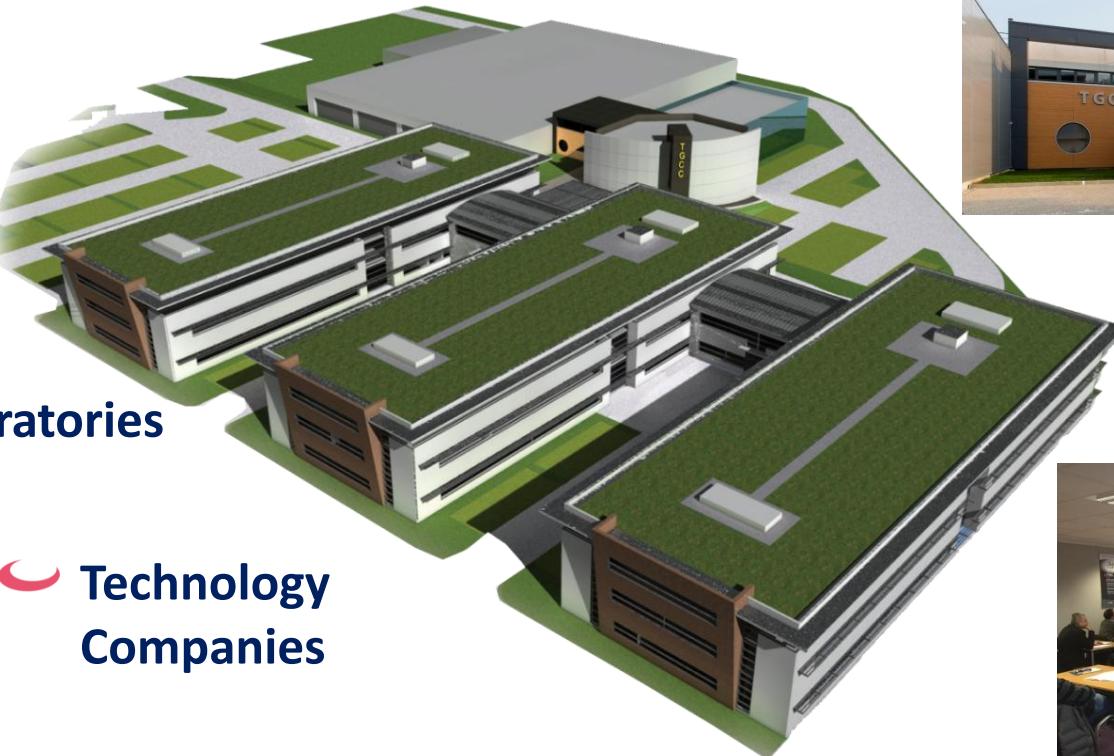

Teratec Campus

 **TERATEC Campus**

 **CEA Very Large Computing Center**

 **Incubator and Business Center**

 **Industrial Research Laboratories**

 **Technology Companies**

 **Training Institute**

 **Services Platforms**

Teratec Campus

- Two active Industry Labs
 - Extreme Computing : BULL – CEA
 - Exascale Computing Research : INTEL – CEA – UVSQ
- A new lab announced in June : Big Data by Intel

« Intel ouvre, au sein de la technopole Teratec et au profit de ses partenaires, son premier laboratoire européen dédié au développement de solutions Big Data. »

« Emmanuel MACRON salue la décision d'Intel d'établir en France, à Bruyères-le-Châtel, son premier centre européen dédié au Big data. »
- Other labs to be announced in 2015

Teratec Campus

- **Technology Companies, Incubator and Business Center**
 - AVANTIS TECHNOLOGY - BULL – CMI DEFENCE - ESI GROUP – SILKAN
 - The ESSONNE CHAMBER OF COMMERCE AND INDUSTRY accomodates SME's and innovative companies
 - EOLEN AS+ - ATEM – CLUSTERVERSION - CYBELETECH - DISTÈNE – NVIDIA - SCILAB ENTERPRISES - NUMTECH - PARATOOLS
 - Adapted solutions, custom tailored support and high quality service in a technology-rich environment

A unique place with active participation of key players of every step of the value chain

The TERATEC initiatives

Teratec is at the forefront of the creation of a nationwide and europewide environment which accelerates the development of HPC:

- **Europe** : ETP4HPC, Center of Excellence, ITEA
- **France** : Supercomputing Industrial Plan, Education (HPC Master MIHPS, and others under preparation)
- **International cooperation outside Europe** : Brasil, Mexico, etc.

Promotion & Communication

Teratec 2015-2020

New steps

2015-2020 : more operational responsibilities

In a context where more and more application domains need HPC and more and more categories of actors are legitimate to use it :

- 🌙 Teratec is preparing a major initiative to give SME's access to simulation.
- 🌙 Teratec will participate more directly in active French and European projects : Simulation programs by industry, technical challenges, dissemination ad training.

TERATEC actions for SME's

In more and more industrial domains, simulation has a major impact on competitiveness and innovation capacity.

In the French Supercomputing industrial plan, Teratec has accepted to lead, together with Genci, a national program to give SME's access to simulation.

Teratec will build a dedicated team and focus on some sectorial domains with partners :

- Manufacturing industry together with Systematic
- Building industry together with Advancity and CSTB
- Training program on Simulation realised by SystemX

Just decided and to be launched in October.

TERATEC in FR & EU projects

Being at the heart of the relation between advanced users and technology providers, Teratec is often asked to participate in development projects combining the two types of partners.

It is why we have decided to enter into operationnal projects:

- In France, in some of the initiatives launched in the frame of the industrial plan, like Materials - participation in the future Materials Simulation Lab on the Teratec Campus - and Vegetal - in close cooperation with AgreenTech, la Vallée Numérique du Végétal, recently announced.
- In Europe, in some H2020 projects covering technology and usage, like the POP Center of Excellence on applications performance.

Performance Optimization and Productivity

EU H2020 Center of Excellence (CoE)

1 October 2015 – 31 March 2018 (30
months)

- **A horizontal center of excellence**
 - Transversal across application areas, platforms, scales
 - Academic AND industrial codes
- **On Performance Optimization and Productivity**
 - Precise understanding of application and system behavior
 - Suggestion on how to refactor code in the most productive way

? Application Performance Audit

- Primary service
- Identify performance issues of customer code (at customer site)
- Small Effort (< 1 month)

! Application Performance Plan

- Follow-up on the service
- Identifies the root causes of the issues found
- Qualifies and quantifies approaches to address the issues
- Longer effort (1-3 months)

✓ Proof-of-Concept

- Experiments and mock-up tests for customer codes
- Kernel extraction, parallelization, mini-apps experiments to show effect of proposed optimizations
- 6 months effort
