

**THE INTERNATIONAL
MEETING FOR HPC,
SIMULATION, BIG DATA**

27 & 28 June 2017
Ecole Polytechnique, Palaiseau, France

At the Teratec Forum 2017, Big Data and Agriculture go hand in hand!

@Inria

The next 27 and 28 June, the 12th edition of the Teratec Forum will take place on the Campus of the Ecole Polytechnique, Palaiseau, France. Perfect illustrations of the latest trends in the field, the themes of the workshops demonstrate concretely how to understand these technologies in its sector of activity.

Agriculture and Big data are undeniably much in common! The proof on Wednesday June 28 morning, during the 1st workshop A1:

"EMERGING TECHNOLOGIES AND NEW APPLICATION AREAS FOR HPC AND BIG DATA" *Chaired by Christian SAGUEZ, CYBELETECH*

• **Objective:** To take stock of the contributions of the various numerical tools of modeling, simulation and learning for the vegetal sectors: field crops and arboriculture. [Read more >>](#)

- The challenges of rate of protein on the grain markets
Philippe FLORENTIN, Directeur Général Adjoint, NORIAP
- New approach to fertilization needs
Philippe MICHONNEAU Directeur développement agronomique de la SCARA
- INRA Booster services platform
Suzanne REYNDERS, INRA
- Tools to aid in the conduct of field crops
Marion CARRIER, Responsable des projets, CYBELETECH
- Issues of the zero residue in orchards
Pierre VARLET, ANPP

And of course, Teratec Forum will also propose: An exhibition, plenary sessions, technical workshops, thematic areas, without forgetting the six trophies of Numerical Simulation awards, organized in partnership with L'Usine Nouvelle et L'Usine Digitale ([For more information, click here](#)) Everything you have to know about HPC (High Performance Computing), simulation and Big Data will be at your disposal during the 2 days on the show.
