

Let's speak about... Efficiency

Be Efficient

HPC Objectives @ Atos

Match customers' needs

Design adapted solutions

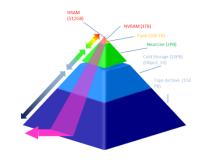

Maximise customers' production

Optimize applications & workflow

Manage data

Leverage new data flows (memory & IO tiering)

Centre pour l'Excellence en Programmation Parallèle

Be Efficient

HPC Objectives @ Atos

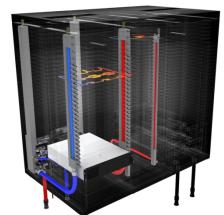

Reduce TCO

Reach Best CAPEX/OPEX with innovative solutions

Rely on recognised expertise

Integrate new usage models

Explore new technologies

1018 exascale

Successor to Curie French National Supercomputer

- Bull Sequana X1000 system
- 9 Pflop/s peak performance for the first phase
- Mix of Intel® Xeon®
 Processor Scalable Family and Intel® Xeon Phi™ based compute nodes
- Close to 400 TB of distributed memory
- Next generation interconnect
- Up to 500 Go/s multilevel Lustre

Available Spring 2018

STFC Hartree Centre

Public HPCaaS offering to UK academics and Industry

Hartree's Challenge

- Provide an **effective**HPC service to industry
- Enable easy, secure access through a portal interface
- Provide a simple charging mechanism,
 Enable a shared riskreward revenue stream for Hartree Centre

Hosting Univ of Oxford

- Hosting Deep Learning & AI National Service
- ▶ DLaaS with XF

extreme factory

Centre pour l'Excellence en Programmation Parallèle

Center for Exploration & Innovation

Atos Solution

- First Bull **Sequana** Supercomputer in the UK
 - Intel Xeon x86, Xeon Phi and Nyidia GPUS
 - one Mellanox Infiniband
 Interconnect
- ► Extreme Factory (XCS and XRV) with Professional services to tailor to interface
- Business Development resources
- Atos commitments to help develop the HPCaaS offering

Bull Sequana opens to ARM processors

With Cavium® ThunderX2™ processors

Port, explore and optimize your applications with our experts
