

Press release - Bruyères-le-Châtel - November 2022

Teratec and Infopro Digital join forces to develop the Forum Teratec

High-power digital technology is transforming industry. The use of supercomputers, simulation, artificial intelligence along with quantum technologies development are profoundly changing all industrial activities. The Forum Teratec has become the privileged trading venue between suppliers and users, industrialists and researchers engaged with these subjects. Being essential for industry, these exchanges must be constantly developed and renewed, which is why Teratec is joining forces with the Infopro Digital Group to give a new dimension to the Forum Teratec. From 2023 together on, we will co-organize the Forum Teratec with a three-fold objective:

- Strongly develop the French and International audience to make it THE European reference event for high-power digital technologies and their uses,
- Constantly evolving in content, the Teratec Forum will be expanded and complemented throughout the year by thematic morning sessions,
- Give means for strong development in both the short and long term by developing its business model, while maintaining the concepts that made it successful.

The 18th Forum Teratec will take place on May 31st and June 1st 2023 at the Parc Floral in Paris to be enriched with 3 thematic morning sessions in April, September and November 2023.

The Teratec and Infopro Digital teams are currently working on the organization and animation of the Forum Teratec 2023 with a new program including plenary sessions, technical workshops and an exhibition, held on May 31 and June 1 at the Parc Floral de Paris and complemented by thematic morning sessions in digital format planned in April, September and November 2023. A permanent digital platform providing access to all contents of the Forum Teratec will disseminate information from sponsors and exhibitors, to ensure the permanent animation of the simulation, HPC/HPDA, AI and quantum for their community.

With such a program available throughout the year in different formats (keynote speakers, conferences, roundtables, technical workshops, research sessions...) and the power of communication and dissemination of Infopro Digital, our goal is to allow this community to receive regular information matching the quality of the Forum and to provide accurate information on the major topics of the moment such as energy, health, materials or security.

We invite you to reserve the dates of May 31 and June 1, 2023 in your agendas. We remain at your disposal for any further information.

❖ About Teratec

Founded in 2005, Teratec brings together major French and European industrial players in the high-power digital sector to accelerate the mastery and dissemination of digital technology and actively contributes to the development of technologies and uses, with the major objectives of developing high-level skills and creating jobs.

Association TERATEC

Campus Teratec - 2, rue de la Piquetterie - 91680 Bruyères-Le-Châtel - France
Tel. : +33 (0)9 72 65 52 26 – infos@teratec.fr – www.teratec.eu

Teratec and its members participate in national and European initiatives in the entire field of simulation and supercomputing, data analysis and artificial intelligence, and tomorrow's quantum computing. Teratec leads the French Competence Center for the major European program EuroHPC, which has just created a marketplace to become the national platform for exchanges between suppliers and users.

The Teratec Forum is a major event in Europe, bringing together every year the best international experts in high-power digital technologies and their uses.

❖ **About Infopro Digital**

Infopro Digital is a B2B Media and Event group specializing in information and technology. Ranked as the 8th largest technology group in France, the group is present in 18 countries and employs nearly 4,000 people. Its innovative solutions are aimed at professional communities in 5 key economic sectors: construction & public sector, automotive, risk & insurance, industry, and retail. Thanks to the group's sectorial expertise, Infopro Digital fulfills all professionals' needs. Its solutions enable decision makers to take well informed choices and initiatives and for companies to sustainably develop their commercial activity and performance.

Infopro Digital is the 4th largest organizer of trade shows in France. Each year, our trade shows bring together more than 200,000 visitors and over 6,300 exhibitors. The group also organizes more than 200 professional events per year in France and around the world (conferences, customized events) with a strong content dimension, in hybrid format (face-to-face and digital) and 100% digital. Our formats are varied and have a high usage value: trade shows, conferences, one-to-one meetings...
